RoHS Compliance Declaration

This is to certify that since July of 2006, Sunburst has been in compliance with the EC Directive on Restriction and Use of Hazardous Substances [EU Directive 2002/95/EC and subsequent amendments]. Sunburst operations are structured to process both leaded and RoHS production due to the implementation of rigid processes that define and control both methodologies.

These processes include:

- Unique part numbering system for RoHS compliant product
- Identification and inspection of RoHS specific material
- Comprehensive handling instructions for RoHS items
- Clearly defined VA's, tools and process routings
- Well trained operators throughout the manufacturing floor

Sunburst maintains compliance with RoHS by:

- Working with our vendors to confirm compliance of parts
- Strictly controlling the parts and materials used in the RoHS processes
- Periodic audits of processes to insure continuation of RoHS compliant product.

If you have any further questions, please contact Sunburst Electronic Manufacturing Service.
